PROFILE

Software developer with 3+ years of experience, having contributed to multiple real-world projects and delivered measurable value to clients. Possesses strong logical thinking, along with solid analytical and problem-solving skills, and consistently takes a proactive approach in proposing optimal solutions.

My goal is to become a key member of a technical team, contributing to the development of high-quality products while continuously improving my professional expertise. I work effectively both independently and in team environments, with a strong sense of responsibility, attention to detail, and good communication skills.
